WORK EXPERIENCE

Sr. Software Engineer

04/2024 - Present

SolGuruz LLP

Ahmedabad

- Working as a Python Developer and DevOps Engineer.
- Expertise in CI/CD processes using Jenkins and GITLAB.
- Worked closely with customers to develop fintech applications that lend loans to users pay their bills using that money and pay back loans in installments.
- Streamlined build, test, and deploy processes using Jenkins CI/CD and GitHub.
- Played an active role in the containerization of new and existing applications.
- Led and delivered multiple releases of an activity and time-tracking desktop app.

Software Developer

06/2022 - 02/2024

AeonX Digital Solutions Pvt. Ltd.

Bhuj

- Designed and orchestrated a fully automated CI/CD pipeline for containerized deployment using AWS CodePipeline, CodeBuild, and CodeDeploy.
- Automated build, testing, and deployment processes across development, QA, and production environments.
- Leveraged key AWS services: CodeCommit, ECR, ECS, Route53, S3, CloudFront, WAF, VPC, RDS, EC2, IAM, ALB, and CloudWatch.
- Led the development of a secure API-driven digital signature platform with PFX certificate uploads and PDF signing capabilities. Ensured secure certificate management, audit trails, and user-friendly web portals.
- Contributed to a QR-coded voucher system enabling campaign creation with customizable voucher values and expiry dates.
- Implemented multi-level campaign approvals, role-based permissions, and intuitive QR code scanning.

Software Developer

09/2019 - 06/2022

Arkay Apps Pvt. Ltd.

Bhuj

- Designed and implemented RESTful APIs enabling seamless communication between mobile/web applications and servers, enhancing user experience.
- Led AWS and DigitalOcean cloud architecture design and management, focusing on security, scalability, and serverless as well as traditional setups.
- Developed robust microservices backends and APIs using FastAPI and AWS Lambda in Python for CRM and Gig Marketplace projects.
- Integrated ReactJS for intuitive admin dashboards, ensuring smooth collaboration with frontend teams.

Software Developer

12/2018 - 09/2019

Oviyum Technologies

Bhuj

- Developed a comprehensive image processing pipeline using Python, RabbitMQ, and Machine Learning for efficient vehicle image ingestion, processing, and analysis.
- Designed and implemented a specialized OCR system optimized for vehicle images, accurately extracting vehicle make, model, and license plate numbers.
